

RIT-College of Imaging Arts & Sciences
Rochester NY

This interior renovation of 54,000 square feet brought the Gannett Building from film photography to digital technology. New spaces included large tiered computer labs, editing stations and printing facilities. Interiors for these spaces are "color neutral" for optimum productivity. The Film Study and Animation School has state of the art theaters and acoustically controlled recording rooms. Social spaces and corridors encourage student community with its energetic colors and forms.

Enrico Fermi School No.17
Rochester City School District
Rochester NY

This capital improvement project included complete building window replacement and new security screens were added on the first floor. The project included asbestos and PCB abatement. Stairwell tile was abated and new non-slip rubber flooring was installed. To accentuate the school entry the existing concrete plaza was replaced with a custom colored geometric pattern which now reflects the youthfulness of the students.

Education

Arnett Branch Library

City of Rochester Libraries
Rochester NY

The objective for both facilities was to create areas within the existing libraries specifically for teens. Bold color, space defining ceilings, new lighting and furniture complete the teens' zone. The shelving has been reoriented and reconfigured to provide better line of sight and definition between the adults, teens, and children areas throughout the libraries.
